Brignola Jr, Nicholas T - New Haven, CT
Subject: Vehicle First Aid kits.
Attachments: New Form 11_29_14 1.pdf

To all Commanders/Transportation Officers.

As per CAPR regulation 77-1, para 2-2k, "First aid kits carried aboard CAP ground vehicles, will be inspected regularly to ensure that they are in good condition, that they contain the proper items and to replace components that have been consumed or have expired. A first aid kit component list will be periodically reviewed to ensure that the kit meets the needs outlined in the applicable code. If first aid kits are carried aboard CAP ground vehicles, either electively or by law (not required in Connecticut), they will be provided by the unit and the inspection schedule shall be published in a wing supplement to this regulation".

As stated above, the Wing Supplement will be amended to require inspection of vehicle First Aid kits, at each scheduled servicing or six months, whatever occurs first. Additional all vehicle First Aid kits must have a component list and components will be inspected against this list as part of this inspection. All expired items will be disposed of and replaced as necessary. Units will be required to respond to CTLGT upon completion of the required servicing that the First Aid inspection was completed, along with recording on the attached verification sheet. This sheet will be maintained in the vehicle log book.

This inspection will commence effective with the first servicing in calendar year 2015.

This will be included in the next revision of the Connecticut Wing supplement to CARPR 77-1.

Contact me with any questions.

Thanks,

Nicholas Brignola

This image shows a single sheet of white paper with horizontal black ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slightly textured appearance, typical of standard notebook or school paper. There is no handwriting or other markings on the page.
